FEATURES

Current sharing

Is used to balance the load between up to 10 units working in parallel. For more units contact us.

Extra output with series diode

Use the series diode output when the output is connected in parallel with other power supplies to achieve redundancy

External output voltage sense

If the output voltage regulation at the load is critical, the sense can compensate voltage drops up to 5% of the nominal voltage.

Over voltage limit/ Under voltage alarm

The built in relay changes to alarm state if the converter output voltage is not within 90 to 115 % of nominal output. An independent regulation circuit limit the output voltage.

The user can select NO or NC relay function. The relay rating is 30 V 0.3 A (d.c. or a.c.), for higher voltage please contact Polyamp.

Inhibit input / Power down

The unit allows remote start and shutdown of the converter by an external signal voltage of 5 to 12 V, max 35 mA.

Overvoltage protection OVP

The output voltage is limited to 15 % over nominal output voltage by

Reverse input voltage protection

The PU1000 has input reverse protection. On input code 24 and 48 with a parallel diode, which is dimensioned to blow an external input fuse. Other inputs use an input series thyristor.

Operating temperature range

The PU1000 series is rated to +55°C @ 100% load and continuous operation.

OPTIONAL FEATURES

Train input

Input voltage range according to train standard EN 50155 and IEC 60571, see train T-inputs below.

Inrush current limit with NTC

Reduce the inrush current during start up. the input voltage range will be affected.

Conformally coating, option I

For environment with high non condensing humidity max 98 % RH.

-40 or +70 °C operating temperature

PU1000 is designed for operation up to +70°C with derating. Temporary temperature rise e.g. as described in EN 50155 T3 up to +85°C can be accepted as the cooling system has a thermal inertia. -40°C is optional as we need to test each batch.

EN IEC 61000-4-5 level 4

External varistor + surge arrestor mounted from pole to ground. With this filter the input meets level 4 of EN IEC61000-4-5 (+/-2 kV line to line, 4 kV line to ground)

19” rack mounting bracket L89-1

To mount one PU1000 to form a full 19” rack unit 2U, see figure 1.

Mounting brackets L216-1

Mounting on flat surface in any direction.

See figure 2.

Vertical mounted in 19”-rack

Up to 4 units can be mounted with L480-2 mounting bracket together with L89-1, see figure 3.
